15. Experiment: AI-based Traffic

Prediction for 5G Networks Objective1:

Code:

```
clc;
clear;
close
all;

% Simulated 5G Network Traffic (Mbps)
time = 1:20;
traffic = [20 25 30 35 40 50 60 58 65 70 ...
           75 80 78 85 90 95 100 98
           105 110];

figure;
    plot(time, traffic, '-o',
         'LineWidth', 2);
grid on;

xlabel('Time (Hours)');
ylabel('Network Traffic
(Mbps)'); title('Simulated 5G
Network Traffic');
```

Output:

Objective 2:

Code:

```
clc;
```

```
clear;
```

```
close
```

```
all;
```

```
% Simulated
```

```
Traffic Data
```

```
time = 1:20;
```

```
traffic = [20 25 30 35 40 50 60 58 65 70 ...
```

```
75 80 78 85 90 95 100 98 105 110];
```

```
% Linear Regression
```

```
Model model =
```

```
polyfit(time, traffic,
```

```
1);
```

```
% Predicted Traffic
```

```
predicted = polyval(model, time);  
% Plot Actual and Predicted Traffic
```

figure;

```
plot(time, traffic, 'bo-',
```

```
'LineWidth', 2); hold on;
```

```
plot(time, predicted, 'r*-','LineWidth', 2);
```

```
grid on;
```

```
xlabel('Time (Hours)');
```

```
ylabel('Network Traffic (Mbps)');
```

```
title('AI-Based Traffic Prediction using Linear Regression');
```

```
legend('Actual Traffic', 'Predicted Traffic',
```

```
'Location', 'best'); Output:
```

Objecti

ve 3:

Code:

```

clc;
clear;
close
all;

% Simulated
Traffic Data

time = 1:20;

traffic = [20 25 30 35 40 50 60 58 65 70 ...
          75 80 78 85 90 95 100 98 105 110];
% Linear Regression

Model model =
polyfit(time, traffic,
1);

% Predicted Traffic

predicted = polyval(model, time);
% Calculate

Prediction Error error
= traffic - predicted;

% Calculate RMSE

RMSE = sqrt(mean(error.^2));
disp(['Root Mean Square Error (RMSE) = ', num2str(RMSE)]);
% Plot

Results

figure;

% Actual vs Predicted

Traffic subplot(2,1,1);

plot(time, traffic, 'bo-',

```

'LineWidth', 2); hold on;

```

plot(time, predicted, 'r*-',
'LineWidth', 2); grid on;
xlabel('Time
(Hours)');
ylabel('Traffic
(Mbps)');
title('Actual vs Predicted Traffic');
legend('Actual', 'Predicted', 'Location', 'best');
% Prediction
Error
subplot(2,1,2)
; bar(time,
error); grid
on;
xlabel('Time (Hours)');
ylabel('Prediction Error
(Mbps)'); title('Prediction
Error');
% Display Results
disp('Time Actual
Predicted');
disp([time' traffic'
predicted]); output:

```
